# Swim Meet Seeding Application

## Description

A desktop application for Windows that allows users to seed swim meets. The user can import an Excel Sheet of meet entries, seed meets based on user preferences such as maximum number of events per swimmer, number of lanes in the pool, combining men's and women's events, circle seeding and event seeding order, and export the seeded meet sheet as an Excel Sheet.

The purpose behind this application is to provide a low-cost alternative to College Swim Clubs who cannot afford high end meet seeding software. The meets are seeded according to the event order followed by College Club Swimming.

#### Input Excel Format

The initial excel format of the meet entries that would be imported into the application. The required column headings are "Name", "Team", and "Gender". The user can input as many "Event" and "Event Time" columns as required.

			1st choice	1st choice	2nd choice	2nd choice	3rd choice	3rd choice
Name	Team	Gender	event	event time	event	event time	event	event time
Rishabh Roy	CAL	Mens	50 Fly	00:27.87	50 Free	00:26.32	50 Back	00:31.87

## Walkthrough

The instruction page walks the user through the steps they need to take to successfully import, seed their swim meet, and export their Meet Sheet.

💥 Swi	m Meet Se	eding			_		$\times$
Import	Settings	Seed Meet	Export	Export Sample File			
				Please follow the instructions to seed your meet:			
		Ple	ase oper	<ol> <li>Export sample file using the 'Export Sample File' tab in the menu bar.</li> <li>and follow the instructions in this file before proceeding with the rest of the seeding process. (Note and follow column headers)</li> </ol>			
				2) Import Excel File containing meet entries using 'Import' tab in the menu bar.			
				3) Click on the 'Settings' tab in the menu bar and fill out all the fields.			
				4) Click the 'Seed' tab in the menu bar to seed the meet.			
			5) C	lick the 'Export' tab in the menu bar to export the seeded results to the desired folder.			
					Copyright 2	2020 Rish	abh Roy

#### Walkthrough Export Sample File

Exporting the sample file is the first step in seeding the user's swim meet. This file informs the user on the required column headers.

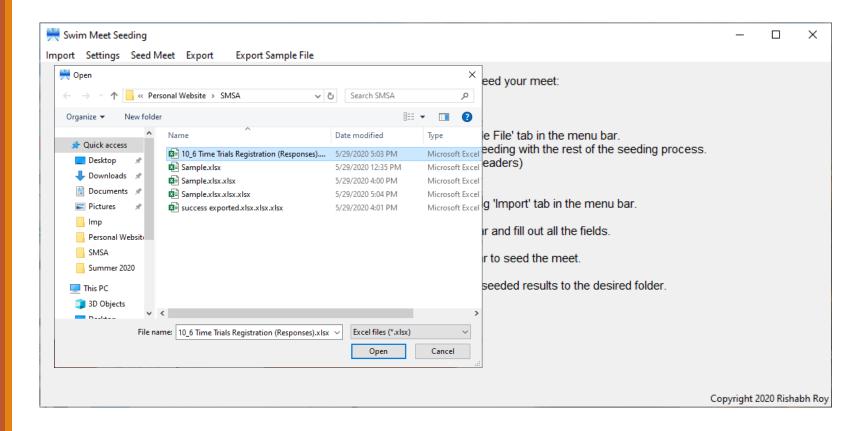

Email	1st choice	1st choice	2nd choice	2nd choice	3rd choice	3rd choice
Timestamp Address Name Team Gender	event	event time	event	event time	event	event time

Event choice and time fields are up to user. The "Name", "Team", and "Gender" fields are mandatory. Please follow the column headers.

This is the format when you export a Google Form as an Excel File. The "Timestamp" field is not required but rather an artifact from exporting the Google Form as an Excel File.

#### Walkthrough Import Meet Entries

Importing the excel file with all the meet entries is the second step in seeding the user's swim meet. Any Excel File can be imported if it has all the necessary columns with their respective headers.

#### Walkthrough Settings Page

Filling out the Settings Page is the third step in seeding the user's swim meet. These settings dictate the number of events per swimmer, the number of swimmers per heat, and other requirements for seeding the meet entries.

<ul> <li>✓ Settings</li> <li>Max Number of Events per Swimmer:</li> <li>Number of Lanes:</li> <li>Combined Mens and Womens Events:</li> <li>No ▼</li> <li>Circle Seeding:</li> <li>Yes ▼</li> <li>Event Seeding Order:</li> <li>Slowest to Fastest ▼</li> <li>Cancel</li> <li>Save Settings</li> <li>ed your meet:</li> <li>File' tab in the menu bar. eding with the rest of the seeding process. aders)</li> <li>File' tab in the menu bar. eding with the rest of the seeding process. aders)</li> <li>i "Import' tab in the menu bar. and fill out all the fields. to seed the meet. eeded results to the desired folder.</li> </ul>	Seeding gs Seed Meet Export Export Sample File		-	×

## Features

Warning Pop-Ups

If the proper order of events is not followed in the seeding process, a warning pop-up appears, asking the user to complete the previous required task before proceeding with the next task.

### Features

Unexpected App Close

If the user tries to close the application before exporting the seeded meet and the meet has been seeded successfully, then a warning message pops up asking for user confirmation before closing the application.
